

Code Review Process

Nexora Labs · Process Document · Engineering · Version 2.0 · Replaces version 1.0

Document ID	PRC-ENG-009	Version	2.0
Category	Process Document	Effective date	2026-08-20
Owner	Engineering	Review date	2027-08-20
Supersedes	PRC-ENG-009 v1.0	Status	Active

0. Summary of Changes in Version 2.0

This version replaces version one. §2.3 on pull request size is removed. §3.3 shortens the review response time from one working day to four hours. §4.3 withdraws the permission to use AI assistants on diffs. §5.1 shortens the Code Review Basics deadline from fourteen days to ten days. §6 on security-sensitive changes is new.

1. Purpose and Scope

- 1.1 This procedure describes how code is reviewed before it is merged at Nexora Labs.
- 1.2 This process is read together with the Deployment and Release SOP (SOP-DEPLOY-007).

2. Opening a Pull Request

- 2.1 Backend Developers and Frontend Developers must link every pull request to a ticket.
- 2.2 A pull request must include a description, test evidence and a rollback note for schema changes.

3. Review Requirements

- 3.1 Every pull request must be approved by at least one reviewer before merge.
- 3.2 Authors must not approve or merge their own pull request.
- 3.3 Reviewers must respond to a review request within four hours.
- 3.4 Software Interns must have every pull request reviewed by their supervising engineer.

4. Review Standards

- 4.1 Reviewers must check each change for secrets, missing tests and breaking API changes.
- 4.2 Frontend Developers must attach screenshots for any visible interface change.
- 4.3 Reviewers must not paste proprietary diffs into any AI assistant.

5. Review Training

- 5.1 New engineers must complete the Code Review Basics module within ten calendar days of their joining date.
- 5.2 Engineers are encouraged to pair on their first three reviews.

6. Security-Sensitive Changes

- 6.1 Changes to authentication or payment code must be approved by at least two reviewers, one of them from the Infrastructure team.
- 6.2 DevOps Engineers must review every change to pipeline configuration.
