

DevOps Engineer Role Description

Nexora Labs · Role Description · Infrastructure · Version 1.0

Document ID	ROLE-DEVOPS-104	Version	1.0
Category	Role Description	Effective date	2026-04-22
Owner	Infrastructure	Review date	2027-04-22
Applies to	DevOps Engineer	Status	Active

1. Role Purpose

- 1.1 This document describes the responsibilities and onboarding expectations of the DevOps Engineer at Nexora Labs.
- 1.2 The purpose of this role description is to set out what a new DevOps Engineer completes during onboarding.

2. Core Responsibilities

- 2.1 DevOps Engineers must maintain infrastructure as code for every production resource.
- 2.2 DevOps Engineers must review cloud cost alerts every week.
- 2.3 DevOps Engineers should automate recurring operational tasks.

3. Onboarding Requirements

- 3.1 DevOps Engineers must pass the Production Access Certification before the end of their first thirty days.
- 3.2 DevOps Engineers must complete on-call shadowing of at least two shifts before the end of their first sixty days.

Deliberate conflict with SOP-ESCALATE-011 version 2.0 §3.3 (at least three shifts). Present so that precedence resolution and contradiction detection have something to find.

- 3.3 DevOps Engineers must enable hardware key authentication on cloud consoles on their first working day.

4. Production Access

- 4.1 DevOps Engineers may use break-glass access during a Severity 1 incident.
- 4.2 DevOps Engineers must record every manual production change in the change log.
