

QA Engineer Role Description

Nexora Labs · Role Description · Quality Assurance · Version 1.0

Document ID	ROLE-QA-105	Version	1.0
Category	Role Description	Effective date	2026-04-22
Owner	Quality Assurance	Review date	2027-04-22
Applies to	QA Engineer	Status	Active

1. Role Purpose

- 1.1 This document describes the responsibilities and onboarding expectations of the QA Engineer at Nexora Labs.
- 1.2 The purpose of this role description is to set out what a new QA Engineer completes during onboarding.

2. Core Responsibilities

- 2.1 QA Engineers must maintain the regression suite for their assigned product.
- 2.2 QA Engineers must sign off release candidates in the release ticket.
- 2.3 QA Engineers should propose automation for repeated manual checks.

3. Onboarding Requirements

- 3.1 QA Engineers must complete the test automation induction within thirty days of their joining date.

Deliberate conflict with SOP-QA-012 §5.1 (within fourteen calendar days of the joining date). Present so that precedence resolution and contradiction detection have something to find.
- 3.2 QA Engineers must pass the defect triage assessment before the end of their first sixty days.
- 3.3 QA Engineers must attend the release readiness meeting from their first week.

4. Environments and Access

- 4.1 QA Engineers may request device lab access through the QA lead.
- 4.2 QA Engineers must not test against production customer accounts.
