

QA Testing Procedure

Nexora Labs · Department SOP · Quality Assurance · Version 2.0 · Replaces version 1.0

Document ID	SOP-QA-012	Version	2.0
Category	Department SOP	Effective date	2026-07-20
Owner	Quality Assurance	Review date	2027-07-20
Supersedes	SOP-QA-012 v1.0	Status	Active

0. Summary of Changes in Version 2.0

This version replaces version one. §3.2 raises release sign-off from at least one to at least two QA Engineers. §3.3 on exploratory time-boxing is removed. §4.2 shortens Severity 1 defect reporting from one hour to thirty minutes. §4.3 withdraws the permission to close duplicates alone. §6 on accessibility testing is new.

1. Purpose and Scope

- 1.1 This procedure defines how the Quality Assurance department plans, runs and records testing.
- 1.2 This procedure is read together with the Deployment and Release SOP (SOP-DEPLOY-007).

2. Test Planning

- 2.1 QA Engineers must write a test plan for every feature estimated at more than three days of effort.
- 2.2 QA Engineers must review acceptance criteria with the Project Manager before sprint planning closes.
- 2.3 It is recommended that QA Engineers pair with a Backend Developer when designing API tests.

3. Test Execution

- 3.1 QA Engineers must run the full regression suite before every production release.
- 3.2 Every release must have at least two QA Engineer sign-offs recorded in the release ticket.

4. Defect Management

- 4.1 QA Engineers must record every defect in the defect tracker with steps to reproduce.
- 4.2 Severity 1 defects must be reported to the Project Manager within thirty minutes of discovery.
- 4.3 QA Engineers must not close a defect as a duplicate without agreement from the Project Manager.

5. Tooling and Onboarding

- 5.1 QA Engineers must complete the test automation induction within fourteen calendar days of their joining date.
- 5.2 QA Engineers must hold device lab access before testing mobile builds.

6. Accessibility Testing

- 6.1 QA Engineers must run the automated accessibility scan on every release candidate.
- 6.2 QA Engineers should include a UI/UX Designer in manual accessibility checks.
